Introduction

After several years of development, Dogecoin has long become a well-known cryptocurrency and has a huge community of users around the world. Compared with Bitcoin, the price of Dogecoin is very low, and it is very popular among retail investors. Dogecoin is essentially a mockery of retail investors to institutions, and it is also a victory for the spirit of **YOLO**. Its return on investment even surpassed Bitcoin at one time.

CCDOGE inherits the YOLO spirit of Dogecoin and is a 100% community-driven blockchain project. Initiated by core developers from the dogecoin community, CCDOGE is developed based on the Binance Smart Chain. It aims to introduce the spirit of Dogecoin into other public chains and create a DeFi version of "Dogecoin".

About CCDOGE

CCDOGE is an open source blockchain project initiated by the core developers of the original dogecoin community, dedicated to bringing dogecoin to DeFi and providing a decentralized autonomous community for dogecoin enthusiasts worldwide. Early CCDOGE will be first deployed on the BSC smart chain, and will gradually expand to other public chains such as Ether and Solana in the future.

CCDOGE will initially focus on lock-in airdrop and automatic revenue, and will later go live on Swap and NFT platforms one after another.

CCDOGE is the world's first 3A type (auto-gain, auto-deflation, auto-marketing) token. Compared with dogecoin and Shiba inu, CCDOGE has limited total issuance and permanent deflation, supports auto-gain, and is a typical representative of third generation meme tokens. In addition, holders of CCDOGE can participate in up to 300% lock-in mining.

Value

COMMUNITY

CCDOGE is a 100% community-driven open source blockchain project.

COOPERATION

We are committed to building a cooperative and win-win blockchain community and creating a WSB community in the blockchain field.

DOGE

Dogecoin pioneered the meme token and has built an extremely large community worldwide. CCDOGE was founded by the original core developers of Dogecoin to fill the gaps in the dogecoin economic model and to carry forward the dogecoin community spirit.

**ccDoge**

YOU ONLY LIVE ONCE

People only live once, some live in the moment, some have fun in time, some live up to their life, some regret their life. We have owned valuable bitcoins and worthless dog coins; we have experienced numerous bear markets, but found no courage to take the bottom; we hope to write our life with extraordinary, but let mediocrity become the note of life.

YOLO is the core value of CCDOGE community, YOLO symbolizes debauchery and living up to this life. Every CCDOGE member pursues not perfection in everything, but a life without regret. In the pursuit of YOLO, you are not alone in the battle.

WHY ccDoge

CCDOGE is developed based on BSC in the early stage, and will gradually support other public chains such as Ether and Solana in the future, eventually forming multi-chain support. Compared with other meme tokens, CCDOGE has obvious advantages, such as lower cost, automatic destruction, support for multiple chains, etc.

CCDOGE

DogeCoin

Shiba inu

CHAIN	MULTICHAIN	DOGECOIN	ETHEREUM
Auto-Farming		×	×
Auto-Market-maker		×	×
Auto-Deflation		×	×
Yield Farming		×	×
NFT Auction		×	×
DAO		×	×
Locked Mining		×	×
SWAP Bonus		×	×

First 3A Token

2.5%

Auto-Farming

Holding tokens can automatically obtain income without complicated operations such as authorized pledges. 2.5% of each transaction will be allocated to token holders.

5%

Auto-Market-Maker

5% of each transaction will automatically enter the black hole address and be permanently destroyed. Compared with long-term inflation tokens, deflation is conducive to the continuous increase in the value of tokens.

2.5%

Auto-Deflation

2.5% of each transaction automatically enters the liquidity pool.

Locked Mining

Earn Rewards Just Hodling in your wallet!

- 2014,we missed bitcoin;
- 2020,we missed dogecoin;
- 2021,we missed shiba inu;
- We only live once;
- We can't missed opportunities any more!

In order to motivate the core supporters of CCDOGE, we have introduced the feature of lock-in mining. Locked position mining allows users to hold CCDOGE for a long period of time to avoid getting off early and increase their investment returns.

- **+500%**

Locked mining up to 500% return.

- **Multi-mining**

Locked mining also can receive auto farming profit, that's means we got multi profit.

- **Raise+**

Locked mining can make everyone holding CCDOGE, enjoy the benefits of rising CCDOGE prices.

ccDoge Swap

Doge Swap is a cross-chain aggregated trading protocol based on the AMM mechanism that allows users to exchange various types of crypto assets in a decentralized wallet. Users can also earn transaction fees by providing liquidity on CCDOGE Swap.

CCDOGE Swap will be the world's first decentralized exchange to support Dogecoin cross-chain exchange, and will go live in the future with liquidity mining, airdrops, and many other ways to play.

ccDoge NFT

CCDOGE NFT is the world's first MEME themed series of NFT trading platform, the main NFT concepts are CCDOGE, dogcoin, shiba inu and so on. Unlike general NFT trading platforms, CCDOGE NFT will be the first decentralized protocol that supports NFT+DeFi mining.

NFT lending

The CCDOGE NFT platform allows users to pledge various types of different NFT assets for lending, which helps release sunk funds in the NFT market with an initial pledge rate of 1000%, which automatically triggers liquidation when the pledge rate falls short.

NFT Mining

CCDOGE NFT platform supports liquidity mining, users can participate in NFT casting and trading in the platform can get CCDOGE rewards, in addition, users can also pledge NFT assets for mining.

ccDoge DAO

CCDOGE is a 100% community-driven project where governance decisions will be made on the chain. 5% of the revenue generated in the CCDOGE ecosystem will automatically go into the DAO vault. CCDOGE holders can participate in DAO governance, initiate proposals, participate in voting, etc.

Token Distribution

CCDOGE is a native governance token for the CCDOGE ecosystem, issued based on the BEP-20 standard, with a total supply of 2100 trillion.

1
PHASE**YOU**

- Launch official website, deploy Smart Contracts.
- Market warm-up, early business cooperation.
- Launch social media sites, twitter, telegram, etc.
- Begin first round of community airdrops.
- 10,000 telegram members.
- Launch locked mining.
- Apply for listing on Coinmarketcap.
- Apply for listing on Coingecko.
- Third party audit.

2
PHASE**ONLY**

- Launch influencer marketing push.
- Begin 2# round of community airdrops.
- Cooperate with third wallet, trust wallet, tokenpocket etc.
- Partnership with WSB community.
- 50,000 telegram members.
- 50,000 holders.
- Develop for CCDOGE Swap.
Develop for CCDOGE NFT market.
- Launch DAO.

3 PHASE

LIVE

- Launch cross-chain aggregation exchange CCDOGE Swap.
- Launch AMA with WSB community.
- Launch CCDOGE Swap liquidity mining.
- Launch CCDOGE NFT market.
- Release CCDOGE series NFT.
- Release YOLO series NFT.
- Launch NFT mining.
- 200,000 telegram members.
- 200,000 holders.
- Listing on major CEX.

4 PHASE

ONCE

- Launch NFT lending.
- Begin 3# round of community airdrops.
- Community meet up.
- Release WSB series NFT.
- 500,000 telegram members.
- 500,000 holders.
- Launch ccDoge NFT liquidity mining.
- Support dogecoin, ethereum and other public chain.
- Build the world's largest community of CCDOGE.

THANK YOU
